DETAILED ACTION

Election/Restrictions

Claims 1- 11 and 16- 45 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in Paper No. 13.

Applicant elected Group II and claims 12- 15 are under consideration.

Priority

There was no claim to priority in this application.

Information Disclosure Statement

There was no IDS in the file wrapper or in the listed contents.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 12- 15 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. It is not clear how the phage can be infectious if it cannot infect a natural host. Is the phage helper dependent or is this a helper? It is not clear what is meant by "a natural host," because that could be interpreted as not infectious to one natural host but still infectious to another natural host.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 12- 15 are rejected under 35 U.S.C. 102(b) as being anticipated by Borrebaeck.

Borrebaeck discloses a phage that has a mutant form of coat protein (containing a deletion) that has lost the ability to infect a natural host because of the loss of gIII, (Column 1, lines 14- 30, and examples and Claims 1- 4). Phage display libraries are also discussed which include collections of phages.

Conclusion

No claim is allowed.
